Professional Summary

Results-driven Full-Stack Developer and Webflow & WordPress Expert with 5+ years of experience designing and developing responsive, scalable, and high-performance web applications and websites. Proficient in React.js, Next.js, Node.js, Express.js, JavaScript, MongoDB, HTML, CSS, and Tailwind CSS, with extensive experience building custom Webflow and WordPress solutions. Skilled in REST API integration, CMS development, performance optimization, SEO best practices, and responsive UI implementation. Experienced in integrating AI-powered features using OpenAI and Groq APIs to create intelligent web experiences. Committed to writing clean, maintainable code and delivering reliable, user-focused solutions in collaborative and remote environments.

Work Experience

Front-End Developer

2021 – 2025

Techzoid | Gilgit, Pakistan

- Built responsive, high-performance web applications using HTML5, CSS3, JavaScript, React.js and Next.js
- Implemented pixel-perfect UI from Figma, Adobe XD and Sketch designs with JavaScript and Tailwind CSS
- Developed reusable component libraries using React.js, Material UI, Chakra UI and Bootstrap 5
- Integrated REST APIs and GraphQL endpoints into dynamic frontend applications
- Performed page speed optimization achieving 90+ Lighthouse scores on all delivered projects
- Collaborated with design and backend teams using Git, GitHub, Jira, Trello and Slack
- Maintained cross-browser compatibility and ensured mobile-first responsive design on all projects

Webflow & WordPress Developer

2022 – 2026

Techzoid | Gilgit, Pakistan

- Designed and developed custom Webflow websites with advanced CMS architecture for 50+ clients
- Implemented Client-First system and Finsweet Attributes for scalable, maintainable Webflow builds
- Built advanced animations using Webflow Interactions, GSAP and Framer Motion
- Performed WordPress-to-Webflow migrations with zero downtime and custom CMS restructuring
- Integrated third-party tools — Zapier, HubSpot, Mailchimp, Memberstack and Airtable
- Optimized SEO and Core Web Vitals achieving top performance ratings across all Webflow projects

Freelance Full-Stack Developer & Webflow/WordPress Specialist

2021 – Present

Upwork | Remote (Global)

- Delivered 50+ full-stack, Webflow and WordPress projects for startups, agencies and businesses across USA, UK, UAE and Europe
- Developed full-stack applications with React.js, Next.js, Node.js, Express.js and MongoDB
- Built AI-powered chatbots using OpenAI GPT-4 and Groq API with real-time streaming responses
- Maintained 3 active Upwork profiles covering Full-Stack, Webflow/WordPress and Front-End development verticals
- Managed end-to-end client communication, project proposals, invoicing and delivery across all projects

Key Projects

Full-Stack AI Streaming Chatbot

React.js · Node.js · Express.js · Groq API · LLaMA 3.3 70B · JavaScript

Production-ready AI chatbot with real-time word-by-word streaming responses just like ChatGPT. Features a secure Node.js/Express backend that protects the API key, multi-turn conversation memory, and a custom system prompt engine. Fully embeddable as a widget into any Webflow or WordPress site.

- Built secure Express.js backend with environment-based API key protection
- Implemented ReadableStream and TextDecoder for real-time token streaming in React
- Designed clean chat UI with message bubbles, auto-scroll, and typing indicator
- Deployed frontend on Vercel and backend on Railway with CI/CD via GitHub

ProMatch Admin Dashboard

React.js · Node.js · MongoDB · Tailwind CSS · REST API · JavaScript

Full-stack admin dashboard for a professional matching platform. Features user management, role-based access control, real-time analytics charts, advanced data tables with search and filter, dark/light mode toggle, and a fully responsive mobile-first design.

- Built reusable component library with React.js and Tailwind CSS for consistent UI
- Implemented JWT-based authentication with role-based access control (RBAC)
- Integrated Chart.js for interactive analytics dashboards and reporting
- Connected MongoDB database via Node.js/Express REST API backend

Binary Bean Web Application

React.js · JavaScript · Material UI · Chart.js · REST API · JWT Auth

Feature-rich analytics and management web application for Binary Bean. Built with TypeScript for full type safety, interactive data visualizations, modular component architecture, secure JWT authentication, and a dynamic reporting and export system.

- Developed with modern JavaScript (ES6+) ensuring clean, maintainable code across all components and API calls
- Built interactive data visualization dashboards using Chart.js and Material UI
- Implemented real-time data updates with polling and state management using Redux Toolkit
- Designed mobile-responsive layout with Material UI grid system and custom theming

Nav Fuel Web Application

React.js · Next.js · Node.js · MongoDB · REST API · Tailwind CSS

Full-stack fuel management web application with real-time tracking, multi-location support, automated invoice generation, user role and permissions management, and a mobile-responsive interface optimized for field operations.

- Implemented multi-location fuel tracking with live status updates and alerts
- Built automated invoice generation and PDF export functionality
- Developed role-based user management system with granular permission controls
- Optimized for mobile field use with progressive web app (PWA) capabilities

Vehicle Rental Filter Platform

HTML5 · CSS3 · JavaScript · WordPress Embed · Custom API

Advanced vehicle listing and filter system with 5 dropdown filters, live search by name, active filter tags, dynamic card grid, and real-time vehicle count — embedded directly into WordPress via Custom HTML block with zero plugin dependencies.

- Built 5 simultaneous filter categories — vehicle type, fuel, manufacturer, seats and price
- Implemented live search with instant DOM filtering and smooth card hide/show transitions
- Designed mobile-responsive card grid adapting from 3 columns to 1 column on mobile
- Zero WordPress plugin dependency — pure vanilla JS embedded via Custom HTML widget

Technical Skills

Backend / Full-Stack

Node.js, Express.js, MongoDB, MySQL, Mongoose, REST API, GraphQL

Front-End

React.js, Next.js, JavaScript (ES6+), HTML5, CSS3, jQuery

AI / APIs

OpenAI GPT-4, Groq API, Vercel AI SDK, Firebase, Supabase

Design Tools

Figma, Adobe XD, Sketch — Figma/XD to Webflow/React/WordPress

No-Code / CMS

Webflow, Webflow CMS, Framer, WordPress, Headless CMS, Finsweet, Client-First

Styling

Tailwind CSS, Bootstrap 5, Material UI, Chakra UI, Ant Design, SASS

Animations

GSAP, Framer Motion, Webflow Interactions, CSS Animations, Lottie

DevOps

Git, GitHub, GitLab, Vercel, Railway, Docker basics, CI/CD

Integrations

Zapier, Make, HubSpot, Mailchimp, Airtable, Memberstack, Stripe, Calendly

SEO & Perf.

Core Web Vitals, Lighthouse, Technical SEO, Schema Markup, Page Speed

Certificates

Web Development Certification

04/2021 – 10/2021

Certified in HTML5, CSS3, Bootstrap 5, JavaScript, React.js, Next.js, Tailwind CSS and WordPress. Skilled in building responsive, high-performance websites, optimizing UI/UX, and integrating CMS solutions.

Webflow Development Certification

06/2022 – 09/2022

Certified Webflow Developer with proficiency in designing and developing custom Webflow websites. Experienced in CMS integration, animations, SEO optimization, and creating user-friendly, high-performance designs.

Education

Intermediate — Boys Technical College Gilgit

04/2019 – 04/2021

Gilgit, Pakistan

BSc Computer Science — Karakoram International University

04/2022 – 04/2026

Gilgit, Pakistan
